

## Berry Subscription Customer Order Form – 2020

Our subscription order program provides berries weekly to subscribing customers during the 2020 season. The program helps support our farm business costs prior to our harvest. Our work in the field typically begins in the late winter-early spring where we spend hundreds of hours pruning and feeding the plants. We are producing six varieties of blackberries, three varieties of black raspberries, and seven varieties of red raspberries. Harvest is expected from July 1 to the end of September. Weather and plant growth can change this.

The subscription program allows weekly orders to vary based on availability of the berries, the varieties and the needs of the subscriber. The subscriber can pick up more or less than their weekly amount, but it is up to the subscriber to get their total amount during the season. Unused subscription amounts remaining on the Subscriber Card after the season ends cannot be filled but can be held for the following season. Advanced notice of berry pickups exceeding the weekly amounts is appreciated.

A subscription must be paid for in advance (by check, cash or credit card) and includes a total of forty-two (42) pints of berries for a full subscription (\$280.00) and twenty-one (21) pints for a half subscription (\$150.00). Due to variable rates of berry harvest, actual weekly orders can vary in quantity, but over the season will total these amounts. Two subscription options are available as follows (please check your option):

- Full subscription (42 pints) – 4 pints of raspberries and/or blackberries for 10 weeks (\$280.00) plus 2 bonus pints
- Half subscription (21 pints) – 2 pints of raspberries and/or blackberries for 10 weeks or 4 pints for 5 weeks (\$150.00) plus one bonus pint

The subscription price is a savings of \$18 to \$21 (half-order) or \$56 to \$61 (full order) over our on-farm price and the subscriber will receive a tote bag to carry their berries (value \$15).

Berries will be available from 10 am to 6 pm for pickup at the farm. Subscribers are encouraged to schedule a pick up day and start date when the order is made to help us know what will be needed for that day of the week.

Subscribers can vary their day of the week during the season and should notify the farm of vacation dates or other reasons to have different pick up days or frequency.
